Portrait Finishes

Standard Photos No protective finish is applied to the standard portrait. Recommended for wallet size photos only.	Lustre Portraits — These portrait choices are protected with a lustrous lacquer glaze which give the photograph some extra protection against fingerprints and glass covered frames.	Linen Portraits — This choice includes a fine linen finish which gives the portrait dimension. These portraits are mounted on art board and receive a double coating of the Dozier Studio's Lustre glaze which adds additional protection. These photographs may be framed without glass eliminating annoying reflections.	Prestige Portraits — The studio's most elegant presentation. Museum pigmented inks are presented on artist's canvas, watercolor paper or our special non-reflective matte finish, and mounted on gator form board. <i>Our best presentation!</i>
